# [8] Final Project Handover Summary

**Project**: Eventura (powered by Clientura) — Enterprise Event & Hackathon Platform
**Document Version**: 1.0.0
**Release Version**: v1.0.0 Production Ready
**Handover Date**: October 29, 2026
**Delivering Entity**: Senior Full-Stack Engineering & Enterprise Architecture Team
**Receiving Entity**: Product Management, Operations & Client Technical Leadership

## 1. Executive Handover Synthesis

This **Final Project Handover Summary** marks the formal completion and transfer of **Eventura** (`event_management`), a comprehensive multi-tenant event, competition, and hackathon management platform.

The system has been engineered, audited, optimized, and validated to meet enterprise-grade functional, security, and scalability standards. It encompasses a decoupled React 19 frontend with TanStack Start SSR hydration, a high-throughput Express REST API server, a PostgreSQL 15+ relational database governed by Prisma ORM, and integrated Stripe payment and Google Gemini AI services.

All primary milestones, functional specifications, security remeditations, and automated test suites have been verified with a **100% pass rate**.

## 2. Deliverables Verification Matrix

| Scope Item / Module | Specification Status | Delivery Status | Verification Evidence |
|---|---|---|---|
| **[2] Source Code Handover** | Complete repository with clean git tree | **DELIVERED** | 450+ source files, 0 lint/tsc errors, clean build |
| **[3] Project Setup Guide** | Comprehensive cross-platform setup guide | **DELIVERED** | Reproducible dev, staging & production runbook |
| **[4] Technical Documentation** | Full architecture & security documentation | **DELIVERED** | Multi-tier topology, zero-fallback tenant model |
| **[5] Database & API Documentation** | Relational ERD & complete REST endpoint catalog | **DELIVERED** | 45+ tables, 40 API route groups documented |
| **[6] Testing Report** | Multi-tier test evidence & benchmarks | **DELIVERED** | 100% pass: smoke (10/10), routes (116/116), stress (220 ops) |
| **[7] Project Status & Pending Work** | Production readiness audit & roadmap | **DELIVERED** | RC 1.0 verified, roadmap phases 5-9 outlined |
| **[8] Handover Summary** | Formal transition & sign-off document | **DELIVERED** | Sign-off matrices, credentials & support plan |

---

## 3. Source Code & Digital Asset Transfer

The physical and digital custody of the following assets is formally transferred:

### 3.1 Repository & Code Assets

- **Root Directory:** `e:\projects\event_management`
- **Active Git Branch:** `main` (integrated with Lovable repository sync)
- **Frontend Source:** `src/` (116 TanStack routes, 22 feature domain modules, shadcn/ui components)
- **Backend Source:** `server/src/` (40 Express routers, controllers, services, repositories, validators)
- **Database Assets:** `prisma/` (Relational schema, 8 forward-only SQL migrations, master seeder, sync scripts)
- **Test Suites:** `scripts/` ( `smoke-test.ts` , `stress-test-multi-event.ts` , `test-routing.ts` )
- **Documentation Suite:** `reports/` (Full markdown & publication-grade PDF documentation suite)

### 3.2 Compiled Production Bundles

- Client static assets: `dist/` and `.output/public/`
- Server SSR runtime bundle: `.output/server/index.mjs`

---

## 4. Master Credentials, Secrets & Access Matrix

**[CAUTION]**: > The default credentials below are provisioned for local development and initial staging onboarding. Prior to public internet exposure, all default passwords and secrets must be rotated.

### 4.1 Default Administrative Accounts

| Persona | Email | Default Password | MFA State |
|---|---|---|---|
| **Sudo Super Administrator** | `admin@eventura.dev` | `Admin123!` | TOTP MFA Active |
| **Organization Administrator** | `orgadmin@eventura.dev` | `Admin123!` | TOTP MFA Active |
| **Event Operations Manager** | `manager@ascent.dev` | `Password123!` | Password Active |
| **Faculty Coordinator** | `faculty@ascent.dev` | `Password123!` | Password Active |
| **Student Coordinator** | `student@ascent.dev` | `Password123!` | Password Active |
| **Competition Judge** | `judge@ascent.dev` | `Password123!` | Password Active |
| **Technical Mentor** | `mentor@ascent.dev` | `Password123!` | Password Active |
| **Event Participant** | `participant@ascent.dev` | `Password123!` | Password Active |

### 4.2 Core Configuration Keys ( `.env` )

- `DATABASE_URL` : PostgreSQL connection string ( `postgresql://postgres:postgres@localhost:5432/eventura_db?schema=public` )
- `JWT_SECRET` : High-entropy access token secret key
- `JWT_REFRESH_SECRET` : High-entropy refresh token secret key
- `STRIPE_SECRET_KEY` : Stripe API secret key
- `STRIPE_WEBHOOK_SECRET` : Stripe webhook signing secret
- `GEMINI_API_KEY` : Google Gemini generative AI API key

---

## 5. Deployment & Production Verification Sign-Off

The system has passed all pre-handover validation gates:

```
[✓] TypeScript Strict Compilation: PASSED (0 errors via npx tsc --noEmit)
[✓] Production SSR Build:          PASSED (Nitro bundle built in 2.07s via npm run build)
[✓] End-to-End Smoke Test:        PASSED (10/10 suites passed via npm run test:smoke)
[✓] Route Health Matrix:          PASSED (116/116 routes passed via npm run test:routes)
[✓] High-Concurrency Stress:      PASSED (220 ops across 5 tracks via npm run test:stress)
[✓] Multi-Tenant Isolation:       PASSED (Zero cross-tenant data leakage confirmed)
[✓] Security & MFA Audits:        PASSED (No bypasses, strict tenant guards)
```

---

## 6. Operational Runbook Quick Reference

To ensure smooth operational handover, the primary administrative commands are summarized below:

```
# 1. Apply database migrations to production
npx prisma migrate deploy

# 2. Synchronize reports RBAC permissions idempotently
npm run sync:reports-permissions

# 3. Create full database backup
pg_dump -h <HOST> -U <USER> -d <DB> -F c -b -v -f ./backup_$(date +%Y%m%d).dump

# 4. Compile frontend SSR production build
npm run build

# 5. Start production SSR server
node .output/server/index.mjs

# 6. Start production API server
npm run server

# 7. Execute automated health check
curl http://localhost:3000/api/v1/health
```

---

## 7. Warranty, Support & Knowledge Transfer

- **Warranty Window**: 30 calendar days from the date of handover sign-off.
- **Coverage**: Remediation of any latent critical or high-severity functional bugs discovered within the scope of the agreed requirements specification.
- **Escalation SLA**: Critical production incidents (P1) acknowledged within 2 hours; standard maintenance queries addressed within 24 business hours.
- **Knowledge Transfer**: The accompanying technical documentation, setup guides, API catalogs, and test suites provide comprehensive reference material for inbound engineering teams.

---

## 8. Formal Acceptance & Sign-off

By signing below, the authorized representatives confirm that the **Eventura** software deliverables have been inspected, tested, verified, and accepted in accordance with all delivery specifications.

### Delivering Engineering Team

**Lead Software Architect**: Senior Full-Stack Engineering Team
**Title**: Lead Enterprise Architect & Engineering Lead
**Status**: Handover Completed & Verified
**Date**: October 29, 2026
**Signature**: `[SIGNED - SENIOR ARCHITECTURE TEAM]`

### Receiving Client / Operations Team

**Authorized Representative**: Product & Technical Operations Lead
**Title**: VP of Product / Technical Operations
**Status**: Deliverables Inspected & Accepted
**Date**: October 29, 2026
**Signature**: _____
